

Software/Hardware Firm with Patented Solutions for e-Commerce Fulfillment and Manufacturing

National/International Reach—Based in South Carolina

2021 Revenue \$2.4 million | 2021 EBITDA \$1.0 million

Headquartered in South Carolina, the Company designs, develops, deploys and supports hardware and software solutions for order fulfillment in distribution centers as well as kitting and sequencing for manufacturing. These solutions are targeted at improving both speed and accuracy of fulfillment operations, primarily for ecommerce orders from individual consumers and for store replenishment applications. The Company designed custom hardware and software systems that are based upon both granted and pending patents. The innovative designs and strong intellectual property position will greatly increase the Company's ability to maintain a competitive advantage within the supply chain industry. The Company's core markets: industrial tools and accessories, organic fruits and vegetables, apparel/party supplies, jewelry, cosmetics, tobacco products, vitamins and supplements, salon products, and printed media. The Company is well-positioned for continued growth and success.

Investment Considerations

- **Innovative Product Line:** The Company is known for creating innovative technologies for improving the speed and accuracy of order fulfillment. These technologies include hardware and software designed to provide fast and easy installation and maintenance as well as fault tolerance to enable continued operation in the face of failure
- **Awards and Recognition:** The Company has generated substantial awareness through numerous awards and recognition in major trade shows, trade journals and conferences
- **National and International Reach:** The customer base and operations are national and international in scope, allowing it to service clients wherever they may be located and easily expand into new geographic markets
- **Patented Products:** The Company currently owns numerous patents and trade secrets. The Company has spent considerable time and investment in developing new software and hardware systems accompanied by proprietary processes
